Preface

Chapter 1: Space in Our Lives

1.1 Why Space?
1.2 Elements of a Space Mission
Mission Profile: Voyager

Chapter 2: Exploring Space

2.1 Entering Space
2.2 Space Comes of Age
2.3 Organizing the Air Force for Space Operations
Mission Profile: V-2

Chapter 3: The Space Environment

3.1 Cosmic Perspective
3.2 The Space Environment and Spacecraft
3.3 Living and Working in Space
Mission Profile: ISS

Chapter 4: Understanding Orbits

4.1 Orbital Motion
4.2 Newton's Laws
Mission Profile: Apollo

Chapter 5: Maneuvering in Space

5.1 Spacecraft Ground Tracks
5.2 Simple Orbit Changes
Mission Profile: Gemini

Chapter 6: Interplanetary Travel

6.1 Planning for Interplanetary Travel
6.2 Gravity-assist Trajectories
Mission Profile: JUNO

Chapter 7: Ballistic Missiles and Getting into Orbit

7.1 Intercontinental Ballistic Missiles (ICBMs)
7.2 Launch Windows and Times
Mission Profile: Salyut

Chapter 8: Returning from Space: Re-entry

8.1 Understanding Re-entry Motion
Mission Profile: Space Shuttle

Chapter 9: Space Systems Engineering

9.1 Space Mission Design
Mission Profile: Mars Science Laboratory

TABLE OF CONTENTS

Chapter 10: Space-vehicle Control Systems
10.1 Control Systems
Mission Profile: GPS

Chapter 11: Spacecraft Subsystems
11.1 Environmental Control and Life-support Subsystem (ECLSS)
Mission Profile: HST

Chapter 12: Rockets and Launch Vehicles
12.1 Rocket Science
12.2 Propulsion Systems
12.3 Launch Vehicles
Mission Profile: SpaceX Falcon 9

Chapter 13: Space Operations
13.1 Mission Operations Systems
13.2 Mission Management and Operations
Mission Profile: Apollo 13

Chapter 14: Using Space
14.1 The Space Industry
14.2 Space Politics
14.3 Space Economics
Mission Profile: Iridium

Chapter 15: Manned Space Explorations
15.1 U.S. Manned Space Program
15.2 Soviet Manned Space Program
15.3 Case Study: The Space Shuttle
15.4 Case Study: Space Stations
