Preface  
Authors

## **Chapter 1: Introduction**

- 1.1 Small Satellite Definition
- 1.2 History and Milestones
- 1.3 Motivation
- 1.4 Benefits of Small Satellite Programs
- 1.5 The Originators and Trend-setters
- 1.6 Understanding the Small Satellite Program

## **Chapter 2: Essential Elements of Successful Small Satellite Programs**

- 2.1 Characterize Small Satellite Missions
- 2.2 Entering Space
- 2.3 Resource Planning
- 2.4 Program Sustainment and Funding
- 2.4 Case Studies

## **Chapter 3: Small Satellite Program Planning**

- 3.1 Understand the Context for the Small Satellite Program
- 3.2 Define and Initiate the Program
- 3.3 Organize the People and the Work
- 3.4 Monitor, Evaluate, and Control Program Activities, and Iterate

## **Chapter 4: Small Satellite Project Management**

- 4.1 Plan the Project and Scope
- 4.2 Manage Stakeholders
- 4.3 Organize the Project
- 4.4 Perform Systems Engineering
- 4.5 Estimate Lifecycle Cost
- 4.6 Establish a Budget
- 4.7 Plan for Acquisition and Contracting
- 4.8 Manage Risk
- 4.9 Establish Baselines and Monitor and Control

## **Chapter 5: Legal and Regulatory Considerations**

- 5.1 Overview of the Legal and Regulatory Framework
- 5.2 International Space Law
- 5.3 National Space Law
- 5.4 Contractual and Operational Concerns
- 5.5 End-of-Life and Space Debris Mitigation
- 5.6 International Frequency Allocation and Coordination
- 5.7 National Frequency Allocation and Coordination
- 5.8 Conclusion

# TABLE OF CONTENTS

## **Chapter 6: Mission and Spacecraft Concept**

- 6.1 The Mission from a Functional Viewpoint
- 6.2 The Spacecraft and Its Subsystems
- 6.3 Ground Segment
- 6.4 The Mission from a Lifecycle Viewpoint
- 6.5 Satellite Design Philosophy
- 6.6 Example Satellites

## **Chapter 7: All About Launching**

- 7.1 Launcher Types
- 7.2 Accommodation and Launch Environments
- 7.3 How to Choose a Launcher
- 7.4 Cost Range and Structure
- 7.5 Regulations and Legal Documents
- 7.6 Launch Campaign
- 7.7 Insurance, Customs, Taxes
- 7.8 Risk Assessment and Mitigation Strategies
- 7.9 Launch Brokers
- 7.10 Piggybacking: Determining the Orbit

## **Chapter 8: Mission Operations**

- 8.1 Pre-launch
- 8.2 Launch and Commissioning
- 8.3 Routine Operations
- 8.4 End-of-life Decommissioning or De-orbiting
- 8.5 Sustainability and Future Mission Support
- 8.6 Practical Example of an Operational Mission
- 8.7 References and Resources

## **Chapter 9: BRITE-Austria/TUGSAT-1: First Austrian Nanosatellite—Case Study**

- 9.1 Contextual Analysis, Motivation, and Benefits of the BRITE-Austria Mission—Why Was the Project Started?
- 9.2 Programmatic and Managerial Considerations—How Was the Project Carried Out?
- 9.3 Regulatory Framework
- 9.4 Mission and Spacecraft Concept
- 9.5 Launching Arrangement and Configuration
- 9.6 Mission Operations
- 9.7 Conclusions and Lessons Learned
- 9.8 Acknowledgments

## **Chapter 10: Low-cost Space Missions— A CubeSat Analysis**

- 10.1 Space Systems Thinking
- 10.2 System Architecture, Requirements, and Constraints
- 10.3 Cost Effective Launch and Mission Orbit Selection
- 10.4 Designing a CubeSat Bus
- 10.5 Mission Operations
- 10.6 Real World Values and Conclusions
